DISCLAIMER

Unless otherwise noted, referenced standards and specifications for BMPs included in the Storm Water Pollution Prevent Plan (SWPPP) will follow recommendations of the General Construction Permit, Order No. 2009-0009-DWQ and the California Stormwater Quality Association (CASQA) BMP Manual Guidelines. If, in the unlikely event, the BMP details are not sufficient, or pose a threat to water quality, public health or property, or safety concerns are perceived to exist by using the recommended BMPs, please contact NCRM, Inc. for clarification or changes. If contracted to conduct site inspections, NCRM, Inc. staff are trained to assess the site conditions, recommend corrective actions, and ensure that the implemented BMPs and or corrective actions are installed correctly and are effective.

This SWPPP plan will be prepared in accordance with the Clean Water Act and RWQCB General Construction Permit, Order No. 2009-0009-DWQ to comply with environmental regulations during the project construction. The decisions on how to operate the construction site, including but not limited to the SWPPP implementation and installation of BMPs, as recommended, rest solely with the project Owner and the General Contractor and/or Sub-contractors, not with NCRM, Inc. Therefore, NCRM, Inc. is not liable for the operational decisions of the Owner and/or General Contractor to follow the recommendations as outlined in the SWPPP or in any site inspection recommendations performed by NCRM, Inc. staff. It is the Owner and/or General Contractor responsibility to ensure the site maintains compliance at all times during construction.

NCRM, Inc. is expected to complete and submit a Dewatering and Fish Relocation Program that must be approved before instream work can proceed. An Inspection is to be conducted prior to dewatering and also submitted weekly thereafter during the course of the diversion. To that end NCRM, Inc. has provided a daily rate to conduct such inspections as it cannot be foretold how many work days will include activities that may affect special-status species.

NCRM, Inc. staff are contracted to assess the active, inactive, completed and stabilized areas to ensure that the implemented practices will be effective in minimizing potential pollutant discharges during construction. NCRM, Inc. can ensure compliance only when the Owner and/or the Contractor implement all recommendations and corrective actions in a timely manner and effectively. Situations may arise, that even with appropriate erosion and sediment control measures implemented throughout the site failures may occur.

The Owner and or owner's Contractor agrees to hold NCRM, Inc. harmless for any potential violations the Owner/Contractor may receive for operational violations from regulatory agencies, including but not limited to, such as city governments, the State, or EPA.

NCRM, Inc. will answer questions on how the SWPPP was prepared, inspections were conducted, and corrective actions were recommended/implemented and defend all recommendations made with any regulated authority that may request it. By accepting the proposal, the Owner and their contractor(s) accept this disclaimer and its conditions.
