GEOTECHNICAL SERVICES
OFFICE OF GEOTECHNICAL DESIGN NORTH

Subject: Addendum to Geotechnical Memorandum

This memorandum is an addendum to the "Geotechnical Memorandum" by Scott Lewis, dated June 1, 2015.

Section 8.4 Impact of Bridge Construction and Completion upon the Railroad Infrastructure and Existing Viaduct - Analysis and Design of the memorandum dated June 1, 2015 incorrectly reports that the potential loading effects upon the railroad tunnel created by the construction and presence of the new bridge are addressed in the separate memo by Song (2015).

The potential loading effects upon the railroad tunnel created by the presence of the new bridge are addressed in the separate memo titled "Geotechnical Engineering Evaluation of Permanent Loading on the Union Pacific Railroad (UPRR) Tunnel" by Reza Mahallati, dated August 7, 2015

If you have any questions or require additional assistance, please contact me at (707) 445-6036.

CHARLIE NARWOLD
Senior Engineering Geologist
Office of Geotechnical Design North
