Subject: Construction Water Usage for Project (EA 0T6101 ID # 0615000217)

Good morning Mr. Rob,

I am working on a projects in Kings County on Route 5 in and near Kettleman City from Route 5/41 separation to Fresno County line. The project is proposed to cold plane 0.08' existing AC pavement, and overlay 0.1' Rubberized Hot Mix Asphalt on the existing AC pavement. I am trying to secure the construction water usage for this project. This project will need approximately 696,301 gallons of water (2.14 Acre-foot). Construction of the project will begin in the summer of 2016. Please advise if the City of Clovis could provide the construction water usage for the project.

Thank you so much.

Zhi Zhan Lin, PE

Caltrans, Pavement Preservation.
